

Software Solutions

TARGETED, SCALABLE AND INDUSTRY SPECIFIC

SOFTWARE

We offer many software solutions to make the most of digital convergence in a connected office. We support products that allow you to digitally send documents to email, to secure data at its most vulnerable moment (printing), to route, store, archive and retrieve paper and electronic documents, and to track who creates documents, where documents go, and what they cost.

DOCUMENT OUTPUT

Verity Group understands documents and how their flow throughout the work-place, impacts the bottom line. We help customers improve their businesses through a suite of document output solutions customized to your unique business needs. This includes best-of-breed imaging products, document workflow software, print management and ongoing technical service, support, and supplies.

TARGETED

We have developed targeted solutions to meet specific business objectives, such as enhancing security, controlling costs of document production, integrating new technologies, managing a fleet of imaging systems, and improving employee productivity.

RIGHT-SIZED

We are experts at providing solutions that are right-sized to your workgroup, department or production environment to maximize utilization and minimize operating costs. We understand the intricacies of migrating from analog to digital technologies and local printers to network connected multifunctional devices.

INDUSTRY SPECIFIC

Our solutions can be tailored to your company's specific industry such as Legal, Healthcare, Banking, Education, Finance, Transportation, Communications, etc.

Gain control of your document output environment.
